Hi Lynn,

I just wanted to let you know that Bryce Haas called me today and said that he had equipment problems and may need a couple more weeks to complete his reclamation of the Fayette Quarry. I told Bryce that his SITLA permit will expire on April 30, 2009, but that SITLA will allow him to access the site for a couple more weeks beyond that date in order to complete the reclamation. I told Bryce that DOGM holds the bond, and that I would hold off filing any claim against the bond before Memorial Day. He promised to have the work completed. I hope we can coordinate our efforts to achieve compliance by Bryce. Lets stay in close contact regarding this matter. Thanks.
